The City of Bridgeport, Bridgeport Chief Administrative Office, 999 Broad Street, 2nd Floor, Bridgeport, Connecticut 06604 has requested a Corps of Engineers permit under Section 10 of the Rivers and Harbors Act of 1899, and Section 404 of the Clean Water Act to relocate an existing marine facility (M.O.V.E. Yacht Club, Inc.). The facility will be relocated from Pequonnock River to the Yellow Mill River at their property located off 148 Waterview Avenue. The project includes the following:

- Construction of a 60' x 6' access pier that will extend over inter-tidal *Spartina* habitat. The deck will include spaces between the pier planks to allow natural light to penetrate under the structure.
- Construction of a 16' x 5' timber gangway.
- Construction of a floating structure of 54' x 6' floating access dock, a 260' x 6' main floating access dock, and 18 finger piers.
- Construction of a concrete block bulkhead 213' x 2' for shoreline protection of a steep bank.
- Construction of a boat ramp impacting 2100 square feet of an inter-tidal area.

The project will impact a total of 7456 square feet of Essential Fish Habitat (EFH) - see attached sheet 3 for list of species and life stages. Loss of this habitat will primarily result from filling of 2596 square feet of sand and gravel for a bulkhead and boat ramp, shading of 360 square feet of *Spartina* habitat from an access pier, and shading of 4500 square feet of an intertidal flat from placement of miscellaneous floating structures. Loss of this habitat consists of the same species shown on sheet 3; however the District Engineer has made a preliminary determination that the site-specific adverse effect will not be substantial. Further consultation with the National Marine Fisheries Service regarding EFH conservation recommendations is being conducted and will be concluded prior to the final decision.

This project is located on the USGS BRIDGEPORT, CONN quadrangle sheet at UTM coordinates 456000 N and 065300 E.

In order to properly evaluate the proposal, we are seeking public comment. Anyone wishing to comment is encouraged to do so. Comments should be submitted in writing by the above date. If you have any questions, please contact Senior Project Manager at (978) 318-8335, (800) 343-4789 or (800) 362-4367, if calling from within Massachusetts.

Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider the application. Requests for a public hearing shall specifically state the reasons for holding a public hearing. The Corps holds public hearings for the purpose of obtaining public comments when that is the best means for understanding a wide variety of concerns from a diverse segment of the public.

DETAILS OF EVALUATION
FACTORS**

**Robert J. DeSista
Chief, Permits & Enforcement Section
Regulatory Branch**

The decision whether to issue a permit will be based on an evaluation of the probable impact of the proposed activity in the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit which may reasonably accrue from the proposal must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered, including the cumulative effects thereof; among those are: conservation, economics, aesthetics, general environmental concerns, wetlands, cultural value, fish and wildlife values, flood hazards, flood plain value, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food production and, in general, the needs and welfare of the people.

Where the activity involves the discharge of dredged or fill material into waters of the United States or the transportation of dredged material for the purpose of disposing it in ocean waters, the evaluation of the impact of the activity in the public interest will also include application of the guidelines promulgated by the Administrator, U.S Environmental Protection Agency, under authority of Section 404(b) of the Clean Water Act, and/or Section 103 of the Marine Protection Research and Sanctuaries Act of 1972 as amended.

Based on his initial review, the District Engineer has determined that little likelihood exists for the proposed work to impinge upon properties listed in, or eligible for listing in, the National Register of Historic Places, and no further consideration of the requirements of Section 106 of the National Historic Preservation Act of 1966, as amended, is necessary. This determination is based upon one or more of the following:

- a. The permit area has been extensively modified by previous work.
- b. The permit area has been recently created.
- c. The proposed activity is of limited nature and scope.
- d. Review of the latest published version of the National Register shows that no presence of registered properties listed as being eligible for inclusion therein are in the permit area or general vicinity.

Pursuant to the Endangered Species Act, the District Engineer is hereby requesting that the appropriate Federal Agency provide comments regarding the presence of and potential impacts to listed species or its critical habitat.

The initial determinations made herein will be reviewed in light of facts submitted in response to this notice.

The following authorizations have been applied for, or have been, will be obtained:

- ☒ (X) Permit, License or Assent from State.
- ☐ () Permit from Local Wetland Agency or Conservation Commission.
- ☒ (X) Water Quality Certification in accordance with Section 401 of the Clean Water Act.

The States of Connecticut, Maine, Massachusetts, New Hampshire and Rhode Island have approved Coastal Zone Management Programs. Where applicable the applicant states that any proposed activity will comply with and will be conducted in a manner that is consistent with the approved Coastal Zone Management Program. By this Public Notice, we are requesting the State concurrence or objection to the applicant's consistency statement.

All comments will be considered a matter of public record. Copies of letters of objection will be forwarded to the applicant who will normally be requested to contact objectors directly in an effort to reach an understanding.

THIS NOTICE IS NOT AN AUTHORIZATION TO DO ANY WORK.

If you would prefer not to continue receiving public notices, please check here ☐ () and return this portion of the public notice to: U.S. Army Corps of Engineers – New England District, ATTN: Regulatory Branch, 696 Virginia Road, Concord, MA 01742-2751.

NAME:

ADDRESS:

Summary of Essential Fish Habitat (EFH) Designation

10' x 10' Square Coordinates:

Boundary	North	East	South	West
Coordinate	41° 10.0' N	73° 10.0' W	41° 00.0' N	73° 20.0' W

Square Description (i.e. habitat, landmarks, coastline markers): Atlantic Ocean waters within Long Island Sound within the square affecting south of the following: Bridgeport, CT., Fairfield, CT., Blackrock, CT., Southport, CT., Green Farms, CT., and Greenfield, CT., along with Black Rock Harbor from the entrance to the Pequonack River west to Sherwood Pt. (just east of Sherwood Mill Pond) within Long Island Sound. Also affected are: Pennfield Reef, The Little Cows, Georges Rock, and Fayeweather I.

Species	Eggs	Larvae	Juveniles	Adults
Atlantic salmon (<i>Salmo salar</i>)			X	X
Atlantic cod (<i>Gadus morhua</i>)				
haddock (<i>Melanogrammus aeglefinus</i>)				
pollock (<i>Pollachius virens</i>)			X	X
whiting (<i>Merluccius bilinearis</i>)				X
offshore hake (<i>Merluccius albidus</i>)
